

Chapter Contents

Introduction: Programming and Java

0.1 The Theory: Programming and Compilers

What is Programming?

High-Level Programming Languages

Assembler Languages

Machine Language

Compilers

0.2 The Theory: Java

What is Java?

How does it Work?

Chapter 1: Numbers, Strings and Concatenation

1.1 The Theory: The Java Code Structure

What is in a Java Source File?

What is in a Java Class?

What is in a Java Method?

The Java 'main' Method

1.2 Practical: Printing Strings and Sequence

My First Program

Sequence

1.3 Practical: Numbers and Calculations

Lucky Sevens

Order of Operation

1.4 Practical: Concatenation

Joining It Up

Chapter 2: Variables and Data Types

2.1 The Theory: Variables and Data Types

What is a Variable?

What are Data Types?

Java Data Types

Reserved Words

2.2 Practical: Simple Variables

My Variable Program

Variables and Concatenation

2.3 Practical: Using Strings

String and its Methods

2.4 Practical: Converting Data Types

Conversion Methods and Casting Data Types

Chapter 3: Selection and Comments

3.1 The Theory: Selection

IF Statements

3.2 Practical: Using Selection

My First IF Program

More Conditions – AND & OR

- 3.3 The Theory: Extended Selection
Extending IF, with ELSE and ELSE IF
- 3.4 Practical: Using Extended Selection
My Extended IF Program
- 3.5 Practical: Using SWITCH CASE
My SWITCH CASE Program
- 3.6 Practical: Using Comments
Applying Comments to Code

Chapter 4: Libraries and Error Handling

- 4.1 The Theory: Programming Libraries
Using the Java API
Static Methods
Non-Static Methods
- 4.2 Practical: Using Libraries
Using Methods in a Program
- 4.3 The Theory: Importing Classes and Readlines
Importing Classes
Using the Readline Method
- 4.4 Practical: Readlines and Try Catch
Try Catch
- 4.5 Practical: Readlines and IF Statements
Putting it All Together
The Big Two
Readlines and Conversion

Chapter 5: Iteration

- 5.1 The Theory: Iteration
The FOR Loop
- 5.2 Practical: Using FOR Loops
My FOR Loop Program
The Maths Program
- 5.3 The Theory: WHILE and DO WHILE Loops
More Loops
- 5.4 Practical: Using WHILE Loops
Exiting a Loop
The Guessing Game
Simple Shapes Program

Chapter 6: Nesting, Algorithms and More String

- 6.1 The Theory: Nesting Techniques
Nesting Examples
- 6.2 Practical: Nesting and Algorithms
The Colour Mixer Program
The Shapes Program – Writing Algorithms
- 6.3 Practical: Working with Strings
String Methods – The Anagram and The Enigma Game
More String Methods
- 6.4 Practical: Date Formatting
Working with Dates in a Program

Chapter 7: Objects, Methods and Properties

- 7.1 The Theory: Non-Static Methods and Objects
 - Classes and Objects*
 - Objects and Non-Static Methods*
- 7.2 Practical: Using Objects and their Methods
 - Objects and Non-Static Methods in Practice*
- 7.3 The Theory: Properties and Scope
 - Object Properties and Class Properties*
- 7.4 Practical: Objects, Methods and Properties
 - The Currency Converter*
- 7.5 The Theory: Passing Values and Functions
 - Arguments and Parameters*
 - Functions*
- 7.6 Practical: Writing Good Methods and Functions
 - Using Functions in a Program*
 - The Wage Calculator*
- 7.7 Practical: Public Vs Private
 - Using Public and Private*
 - Using Multiple Classes*

Chapter 8: Arrays and Array Lists

- 8.1 The Theory: Variables Vs Arrays
 - Primitive Arrays*
- 8.2 Practical: Primitive Arrays and Loops
 - Using Primitive Arrays in a Program*
 - Arrays and Loops in Tandem*
- 8.3 Practical: Arrays in Programs
 - Arrays and Readlines*
 - The Simple Word Guessing Game*
 - The Advanced Word Guessing Game*
- 8.4 The Theory: Multidimensional Arrays
 - Two-Dimensional Primitive Arrays*
- 8.5 Practical: Using Multidimensional Arrays
 - The Translator*
- 8.6 Practical: Array Lists
 - Using Array Lists in a Program*

Chapter 9: Writing to and Reading from Text Files

- 9.1 The Theory: Writing to a Text File
 - Using FileWriter and PrintWriter*
- 9.2 Practical: Writing to a Text File
 - Writing Data to File*
- 9.3 The Theory: Reading from a Text File
 - Using BufferedReader*
- 9.4 Practical: Reading from a Text File
 - Reading Data from File*

Chapter 10: Defining and Using Classes

10.1 The Theory: Defining Classes

Creating a Data Type

10.2 Practical: Defining and Using Classes

The Guitar Class

The Class and the Array

Dynamic Array Lists and Objects

10.3 The Theory: Constructors

Constructors and Classes

10.4 Final Project: The Pizza App

The Pizza Program – Add, Edit, Delete and View
